PROFESSIONAL SUMMARY

Results-driven SAP Integration Lead and Technical Architect with 17+ years of experience designing and delivering complex SAP S/4HANA integrations and custom development solutions. Expert in architecting CPI-based interfaces, ABAP-driven iFlow frameworks, SAP DMS automation, e-Invoicing, and EWM enhancements. Adept at leading development teams while contributing hands-on to RICEF design, OData services, custom enhancements, performance tuning, BAdIs, user exits, and API/IDoc frameworks. Strong track record in translating business requirements into scalable, clean-core-aligned technical solutions and ensuring seamless system interoperability across SD, MM, PP, FI/CO, and EWM modules. Skilled in stakeholder collaboration, design governance, and mentoring developers to deliver high-quality SAP solutions.

CORE COMPETENCIES

- **Enterprise Integration Architecture**: Expert in designing scalable, secure, and clean-core-aligned SAP S/4HANA integration landscapes leveraging CPI, PI/PO, OData, IDocs, RFCs, CDS Views, and SAP HANA. Proven ability to architect end-to-end solutions across DMS, e-Invoicing, and EWM logistics processes.
- **Advanced Technical Leadership**: Strong track record in leading cross-functional development teams, establishing coding standards, performing architectural reviews, and driving delivery excellence across complex SAP programmes.
- **Strategic Development Expertise**: Mastery in ABAP frameworks (RICEFW), enhancement architectures (BAdIs, User Exits), UI technologies (Fiori/OData), document frameworks (Smart Forms, Adobe Forms), and performance-optimised backend designs.
- **SAP Functional & Cross-Module Competency**: Deep understanding of SD, MM, PP, FI/CO, QM, WM/EWM and their touchpoints, enabling the delivery of harmonised and future-ready solutions.
- **Programme & Stakeholder Leadership**: Trusted advisor to business and IT leadership, skilled in requirement discovery, solution evaluation, integration governance, Agile/Scrum delivery, and driving change across global SAP landscapes.
- **Cloud & API Enablement**: Skilled in designing API-first architectures, secure CPI integrations, and REST/OData-based services supporting modern Fiori and external applications.
- **Document & Engineering Integrations**: Architected advanced frameworks for SAP DMS digitisation, material/document onboarding, and automated document workflows via CPI.
- **Logistics & Warehouse Automation**: Designed solutions for EWM delivery enhancements, warehouse task processing, and automated logistics interfaces.

SAP CERTIFICATIONS

✓ **SAP** Certified Development Consultant — ABAP with SAP NetWeaver 7.50
✓ **SAP** Certified Development Specialist — ABAP for SAP HANA 2.0
✓ **SAP** Certified Development Associate — SAP Fiori Application Developer
✓ **SAP** Certified Development Associate — SAP Cloud Platform

PROFESSIONAL EXPERIENCE

SAP Technical Architect | *Onex Holding, Dubai, UAE*

Duration: Mar-2026 – Current **| Industry:** Oil & Gas (Refinery, Commodity & Oil Trading, Power Plant) **| Project:** SAP S/4HANA Greenfield Implementation (RISE on Private Cloud)

Leading a team of 10 SAP professionals and architecting the complete solution landscape for Onex Group's SAP S/4HANA Greenfield implementation on RISE with SAP Private Cloud. Designed and governed the end-to-end CPI-based integration architecture between SAP S/4HANA and IMOS (Integrated Maritime Operations System) for a fleet of 7 oil tankers, covering voyage cost management, freight invoicing, and bunker procurement workflows. Additionally architected the E-Scale integration with High matrix weighing systems for automated crude oil measurement, interfaced directly with MM and SD modules. Providing solution architecture leadership across FI/CO, MM, SD, EAM, and EWM modules while establishing design governance, coding standards, and delivery frameworks aligned with SAP clean-core and RISE principles.

- Architected the complete SAP S/4HANA Greenfield solution landscape on RISE with SAP Private Cloud for Onex Group, spanning Oil Refinery, Commodity Trading, Oil Trading, and Power Plant business entities across Kurdistan and Dubai.

- Designed and governed the end-to-end CPI-based integration between SAP S/4HANA and IMOS (Integrated Maritime Operations System) for a fleet of 7 oil tankers, covering voyage cost postings, freight invoice processing, and bunker (fuel) procurement workflows.
- Defined API contracts, CPI iFlow designs, payload structures, and error-handling frameworks for all IMOS-to-SAP integration streams, ensuring accurate financial and procurement data flow across FI/CO and MM modules.
- Architected the E-Scale integration solution with High matrix weighing systems, enabling automated crude oil weight capture and real-time integration with MM (goods receipt and inventory management) and SD (delivery and billing) processes.
- Designed the E-Scale data flow and reconciliation framework to validate weight data from physical scales, apply business rules, and post accurate measurement records into SAP inventory and sales documents.
- Architected and delivered a purchase budget check solution for stock items in SAP S/4HANA MM using a two-layer BAdI approach for soft warning with real-time budget visibility in Fiori My Inbox (/IWWRK/BADI_WF_BEFORE_UPD_IB) and hard stop enforcement at the MM document processing layer (ME_PROCESS_REQ_CUST / ME_PROCESS_PO_CUST). Designed a centralised ABAP utility class to calculate available budget indirectly via a custom department-to-cost-centre mapping, covering approved budget (ACDOCP), open PR/PO commitments with multi-currency conversion, and consumption (MSEG) — reusable across both BAdI layers with zero code duplication.
- Led solution design and technical governance across FI/CO, MM, SD, EAM, and EWM modules, translating complex oil & gas business requirements into scalable, clean-core-aligned SAP architectural solutions.
- Leading, mentoring, and managing a cross-functional team of 10 SAP professionals — conducting design reviews, establishing ABAP coding standards, managing workload distribution, and ensuring quality of all deliverables.
- Established integration governance frameworks including CPI iFlow naming conventions, message design standards, error retry strategies, monitoring dashboards, and transport management guidelines across all integration streams.
- Collaborated with business stakeholders across Oil Refinery, Trading, and Power Plant divisions to finalise solution blueprints, manage integration dependencies, and govern technical design decisions at programme level.
- Produced comprehensive architectural diagrams, technical design documents, integration mapping frameworks, and end-to-end testing strategies for all IMOS, E-Scale, and EWM integration workstreams.

SAP Technical Architect | *TAQA Energy Services Company, UK*

Duration: Dec-2024 – Jun-2026 **|** **Industry:** Oil & Gas **|** **Project:** SAP S/4HANA Migration

Led a team of developers and architected end-to-end solutions across SAP DMS integration, CAD-Link enablement, e-Invoicing, and EWM serial number processing. Designed scalable frameworks such as ABAP-triggered CPI iFlows for automated DMS document creation, CAD-Link-driven material and document onboarding, and custom delivery updates based on warehouse task serials. Provided technical leadership, ensured adherence to SAP best practices, and collaborated with cross-functional teams to deliver secure, compliant, and high-quality system enhancements.

- Designed and delivered the SAP DMS integration framework, enabling automatic document creation and attachment upload by triggering CPI iFlows directly from ABAP, including robust error handling and status tracking.
- Developed custom DMS upload RFCs (PDF, URL, and metadata) to seamlessly create DMS documents and link them to material masters using SAP-standard BAPIs and document structures.
- Implemented end-to-end CAD-Link integration, enabling automatic creation of materials and associated DMS documents whenever engineering teams generated new item masters from CAD systems.
- Built a reusable ABAP-to-CPI communication layer using SM59 RFC destinations, HTTPS calls, JSON handling, and authentication for external iFlows supporting DMS and future integrations.
- Led the e-Invoicing technical implementation for the Norway entity within SAP, designing payload generation, validation logic, and API orchestration to meet statutory compliance.
- Architected custom enhancements to capture invoice data, generate compliant XML/JSON formats, and synchronise invoice statuses with government systems through CPI.
- Delivered the solution for serial number assignment and update in outbound/inbound deliveries based on EWM Warehouse Tasks using custom RFCs and BAPI calls to ensure accurate logistics traceability.
- Designed a serial number consolidation and posting framework that validates warehouse task data, updates delivery items, and logs processing results for audit and troubleshooting.
- Acted as technical lead, guiding ABAP developers, conducting design reviews, preparing technical specifications, and ensuring consistency with SAP clean-core principles.
- Coordinated with functional consultants and architects to translate business requirements into scalable designs, ensuring seamless integration across DMS, CAD-Link, e-Invoicing, and EWM delivery processing.

SAP Technical Architect | *Yash Technologies Middle East — KHALIL FATTAL Group, Beirut, Lebanon*

Duration: SEP-2025 – Nov-2025 **|** **Industry:** Trading LLC **|** **Project:** SAP S/4HANA Implementation

Designed and led the complete integration architecture between EBOSS (Client-Side ERP) and SAP S/4HANA Decentralised EWM, covering API design, PI/PO orchestration, and IDoc-based communication for Material, Vendor, Customer, and Delivery interfaces. Defined global API contracts, data mapping rules, and error-handling frameworks, while implementing end-to-end monitoring, message tracking, and status

feedback loops using custom RFCs and EBOSS-side mapping tables. Partnered with EWM, PI/PO, and business teams to finalise solution design, govern interface dependencies, and ensure seamless master and transactional data flow across systems in line with SAP best practices.

- Architected the end-to-end EBOSS → SAP Decentralised EWM integration using APIs, PI/PO orchestrations, and synchronous/asynchronous IDoc processing.
- Defined enterprise API contracts and JSON payload structures with object-key governance for Material, Vendor, Customer, and Delivery integrations.
- Designed the IDoc-triggering framework with message type alignment (MATMAS, CREMAS, DEBMAS, SHP_IBDLV_SAVE_REPLICA, SHP_OBDLV_SAVE_REPLICA) and SAP partner profile strategy.
- Implemented EBOSS-side tracking table for message type, object key, timestamps, and SAP posting status to enable a full audit trail.
- Built custom RFCs used by PI/PO to retrieve IDoc status and confirm posting success or error back to EBOSS in real time.
- Established error-handling, retry logic, and monitoring architecture using PI/PO dashboards and SAP tools (WE02, BD87, SLG1).
- Led cross-functional workshops to finalise mapping sheets, dependency validations, and interface sequencing across 5+ integration streams.
- Produced architectural diagrams, technical design documents, mapping frameworks, and a testing strategy for all EBOSS → EWM flows.
- Standardised integration governance including message-type creation, process-code assignment, transport strategy for Z-objects, and reprocessing guidelines.
- Ensured end-to-end solution alignment with SAP Best Practices for decentralised EWM, ALE/IDoc configuration, and PI/PO integration patterns.

Senior SAP ABAP Consultant | *AMWAJ Group, Doha, Qatar*

Duration: APR-2025 – Jun-2025 **|** **Industry:** Oil & Gas **|** **Project:** SAP S/4HANA Migration

- Designed and implemented enhancements using BAdIs, User Exits, and implicit enhancements for the SAP MM module, improving workflow efficiency.
- Designed a solution for sales order creation from SAP Fiori, catering to complex sales order characteristics for SAP recipe management.
- Conducted requirement workshops with business stakeholders, translating complex needs into technical specifications for SD, MM, and Finance modules.
- Collaborated with functional consultants to deliver ALV reports for MM, enhancing decision-making for client stakeholders.

SAP Project Coordinator | *KHALIL FATTAL Group, Beirut, Lebanon*

Duration: FEB-2025 – APR-2025 **|** **Industry:** Trading Enterprise **|** **Project:** SAP S/4HANA Implementation

- Assisted in creating and maintaining project plans, timelines, and schedules using MS Project and SAP Solution Manager.
- Defined project milestones, deliverables, and dependencies in collaboration with project managers and team leads.
- Ensured alignment of project timelines with business objectives and resource availability.
- Acted as the central point of contact for cross-functional teams including ABAP developers, functional consultants, Basis teams, and business stakeholders.
- Facilitated regular status meetings, prepared agendas, and documented minutes to ensure clear communication.
- Communicated project progress, risks, and issues to stakeholders and escalated critical concerns to project managers.
- Identified potential project risks (e.g., delays, technical challenges) and proposed mitigation strategies.
- Coordinated UAT phases with relevant teams and tracked resolution of outstanding issues.
- Built and maintained relationships with business users, IT teams, and external partners to ensure alignment of expectations.
- Gathered feedback from stakeholders to refine processes and improve project outcomes.

Senior SAP ABAP Consultant | *Amiantit, Dammam, Saudi Arabia*

Duration: AUG-2023 – AUG-2024 **|** **Industry:** Manufacturing **|** **Project:** SAP S/4HANA Migration

- Created and maintained OData services using SAP Gateway (SEGW) to expose HCM data (employee master, organisational structures) for SAP Fiori apps and external systems.
- Defined entity types, associations, and navigation properties in OData models supporting HCM processes: bank details, family member records, training details, and business visa workflows with manager approvals.
- Implemented service logic using ABAP in the Data Provider Class (DPC) and Model Provider Class (MPC) for full CRUD operations.
- Developed OData services integrating HCM components (bank details, family members, business visa, mobile requests, training details) with SAP Fiori front-end applications.
- Ensured seamless data flow between the HCM backend and external applications via OData APIs, maintaining data integrity and security.
- Utilised $filter, $select, $expand, and other OData query options to minimise data transfer and improve response times.

- Debugged OData service implementations in ABAP using breakpoints, runtime analysis, and error logs in /IWFND/ERROR_LOG.
- Extended standard OData services using redefinition and extension techniques to meet custom business requirements for bank details change and family member addition apps.
- Performed unit testing of OData services using SAP Gateway Client and Postman to validate CRUD operations and error handling.

Senior SAP ABAP Consultant | *Emirates Global Aluminium (EGA), Abu Dhabi, UAE*
Duration: Jan-2022 – Sep-2024 **|** **Industry:** Aluminium Producers **|** **Project:** SAP ERP Implementation and Support

- Designed and developed the single-scanning project covering the full SAP WM implementation.
- Designed RF-based applications for multiple storage locations, managing movement of finished goods to local and international customers.
- Applications hosted on 5G scanners and connected to SAP through SAP Console, covering internal stock movements and port-to-freight-forwarder transfers.
- Implemented scanning logic to assign handling units to sales orders and automatically create internal deliveries, shipments, and truck HUs.
- Developed real-time stock location reports to provide the logistics team with live visibility of finished goods.

SAP ABAP | ABAP HANA | UI5 Consultant | *Emirates Global Aluminium (EGA), Abu Dhabi, UAE*
Duration: Jun-2012 – Jan-2022 **|** **Industry:** Aluminium Producers **|** **Project:** SAP ERP Implementation and Support

- Developed SAP Fiori applications using OData and SAP BOBF for the EHS module to record incidents and capture multi-department investigations.
- Developed a module-pool application for the logistics team to automate truck entry and transit note distribution from SAP, saving approximately 600,000 sheets of paper and associated costs annually.
- Built a logistics solution for Dubai Customs to transmit shipping instructions electronically from SAP via PI (SFTP).
- Developed a module-pool application for warehouse management — part of the scanner solution — to create deliveries and shipments for loading handling units onto trucks.
- Designed and developed an SAP WM application to scan and pack handling units into containers, covering batch determination, delivery, and shipment updates; saving 2–3 hours of daily operational time.
- Developed Purchase Order output in Adobe Forms with barcode functionality for business users.
- Developed an interactive ALV report for MM purchase requisitions supporting the e-tendering process, transmitting data in real time to third-party e-tendering software.
- Developed an SD shipment costing report providing month-wise container information for customer deliveries within a specified period.
- Fixed support tickets related to invoice, container tally sheet, and packing list outputs in Adobe Forms.
- Developed an interactive ALV MRP Controller report showing one year of material consumption, with direct navigation to MD16.
- Provided development guidelines to external vendors engaged in ABAP development projects.
- Architected and delivered the integration between the MS SharePoint portal and SAP using the MS .NET Connector.

Lead – ABAP Development | *Emirates Global Aluminium (EGA), Abu Dhabi, UAE*
Duration: Mar-2018 – Sep-2018 **|** **Industry:** Aluminium Producers **|** **Project:** Freight Forwarders Portal — SAP S/4HANA Platform

- Supervised pre-conversion ABAP activities, conducting QA reviews of ABAP code modified to accommodate SAP HANA.
- Created HANA DB procedures to retrieve data from ECC into the SAP HANA database.
- Created OData services to expose data from both HANA and ECC for the freight forwarders portal.
- Created OData services to create customer shipments and deliveries via the FF portal.
- Created underlying RFCs to accommodate business logic changes in ECC.
- Enhanced shipment documents for shipment costing based on freight forwarder requirements.

Lead – ABAP Development | *Emirates Global Aluminium (EGA), Abu Dhabi, UAE*
Duration: Dec-2011 – May-2012 **|** **Industry:** Aluminium Producers **|** **Project:** Freight Forwarders Portal Implementation

- Portal empowered global freight forwarding agents to view stock at their storage locations, receive goods, pack consignments, and create customer invoices.
- Implemented data retrieval from SAP using remotely enabled function modules via SAP .NET Connector.
- Designed and built order display functionality showing orders at various processing stages across customer and replenishment delivery statuses.
- Designed and built stock visibility and aging-day calculation functionality for freight forwarder storage locations.
- Designed and built shipment detail display with Excel download capability.
- Designed and built goods receipt functionality for freight forwarders at their storage locations, using standard SAP BAPIs.

Lead – ABAP Development | *Emirates Global Aluminium (EGA), Abu Dhabi, UAE*

Duration: Apr-2011 – Nov-2011 **|** **Industry:** Aluminium Producers **|** **Project:** Customer Portal Implementation

- Prepared fit-gap analysis, system requirement specification, and functional/technical design documents.
- Implemented SAP data retrieval using remotely enabled function modules via SAP .NET Connector.
- Designed and built quality management data retrieval for alloy analysis certificates.
- Designed and built document display functionality for packing lists, container tally sheets, and analysis certificates.
- Designed and built multi-criteria customer order search (sales order, shipment, invoice, bundle, bill of lading, and delivery numbers).
- Designed and built sales order creation and modification from the portal using standard SAP BAPIs.
- Designed and built contract and quotation modification from the portal using standard SAP BAPIs.

SAP ABAP Consultant | *Atlas Telecom, Dubai, UAE*

Duration: 3 Months (Jan-2011 – Mar-2011) **|** **Industry:** Telecommunication **|** **Project:** SAP ERP Implementation

- Developed HR reports showing employee gratuity amounts and the total days used in calculation.
- Designed a Project System workflow on CJ20N to trigger notifications when a specific user status is set on a project.
- Designed an RFC to retrieve real-time sales data per sales manager for display on PDAs.
- Developed an ADOBE offline form application for internal job posting in HCM, with WebDynpro ABAP editable ALV for subsequent data management.
- Developed a current salary information report using function module CU_READ_RGDIR to read the latest payroll results.
- Built a PO release strategy workflow using standard template WS2000075, with a custom agent determination function module based on cost centres.
- Developed an ABAP programme to send email notifications to users based on work items in the SAP outbox.
- Developed a FI/CO consolidation report for the entire company based on GL sets, using FAGLFLEXA and COSP tables.
- Developed a Purchase Approval Summary application in ADOBE interactive offline forms with workflow-managed signature mandates for multiple approval authorities.
- Developed a FI/CO MIS report covering current period and year-to-date selections using FAGLFLEXA.
- Developed an HR incentive application that retrieves SD sales figures and updates Info Type 15 based on percentage calculations.
- Developed a FI/CO invoice printing programme in SAP SmartForms.
- Applied the ABAP enhancement framework to implement checks in sales order processing.
- Developed an interface programme for bank upload of employee salary payments.

Lead – ABAP Development | *Dubai Aluminium (DUBAL), Dubai, UAE*

Duration: 6 Months (Jul-2010 – Dec-2010) **|** **Industry:** Aluminium Producers **|** **Project:** SAP ERP Implementation

- Prepared process flow diagrams, requirement specification documents, and functional/technical specification documents.
- Designed and developed remotely enabled function modules for the DUBAL corporate website (UMBRACO CMS), converted to Web Services.
- Developed an RFC for dynamic sales order search by sales order, delivery, contract, invoice, and bill of lading numbers.
- Developed an RFC for period-based sales order searching and order overview by pricing and billing month dates.
- Developed an RFC to retrieve historic LME (London Metal Exchange) prices.
- Optimised code to minimise database hits using ABAP performance analysis tool SE30.
- Developed RFCs to change sales orders, split order items, set contract prices, manage pricing formulas, and modify contracts and quotations using BAPI_SALESORDER_CHANGE.

SAP HR-ABAP Lead | *AL-Futtaim Egypt Automotive Division, Cairo, Egypt*

Duration: 3 Months (Apr-2010 – Jun-2010) **|** **Industry:** Automotive **|** **Project:** SAP HCM Implementation

- Participated in the HCM Egypt implementation project, developing various statistical reports in Arabic.
- Developed a progressive income tax calculation programme that updates IT-15 with the calculated tax amount per employee.
- Developed a gratuity calculation programme computing gratuity entitlement for each employee.
- Developed an income tax reconciliation programme that reconciles income tax per employee and updates IT-15.
- Developed a family passage programme calculating entitlement amounts per personal grade and updating P0015.

SAP HR-ABAP Lead | *AL-Futtaim Group, Dubai, UAE*

Duration: 2 Months (Feb-2010 – Mar-2010) **|** **Industry:** Automotive **|** **Project:** SAP HCM Implementation

- Amended various HR programmes as part of the grade change project, applying the new grade policy for UAE employees.
- Developed new SAP Script forms for check printing to accommodate updated requirements, working alongside the FI/CO team.
- Developed a programme to distribute salary slips via email attachment to over 2,500 employees.

- Developed a FI/CO programme to send daily foreign currency rate updates to senior management via email.
- Enhanced MM functionality to trigger email notifications upon creation of new vendors and purchase orders.
- Developed the HR appraisal report in ALV and Smart Forms formats.
- Developed BDC programmes to upload and post FI data from application server files using session and call transaction methods.
- Migrated more than 100 ABAP objects from SAP 4.7 IS-Retail to SAP ECC 6.0.
- Developed custom programmes to extract daily purchase order data and transmit it to third-party demand estimation software SYNCRON.

SAP ISU-ABAP Lead | *Karachi Electric Supply Company, Karachi, Pakistan*

Duration: 9 Months (May-2009 – Jan-2010) **|** **Industry:** Electric Utility **|** **Project:** SAP IS-U Implementation

- Contributed to the core data team for SAP IS-U implementation, covering uploading, mapping, and cleansing of master data.
- Assisted in developing the data strategy document for master data across SAP IS-U, SAP BI, and SAP CRM.
- Mapped data objects: Business Partner, Connection Object, Contract Account, Contract, Device, Installation, and Premise.
- Uploaded Business Master and Technical Master Data using the SAP IS-U migration workbench Emigall, applying custom rules and includes.
- Generated analytical lists of contract accounts by consumption (KWH/RKVA), tariff class, and payment status using IS-U tables.
- Used QUANTI01 to copy user-specific variants via EA88 for billing scenario calculations.
- Developed custom function modules to handle complex scenarios in the IS-U billing schema.

SAP ABAP Consultant | *Spectrum Technologies, Atlanta, GA, USA*

Duration: 3 Months (Feb-2009 – Apr-2009) **|** **Industry:** Consulting **|** **Project:** SAP ERP Support

- Managed ABAP development tasks across HCM, SCM, PLM, FI/CO, SD, MM, Plant Maintenance, and Project Systems modules.
- Developed a Purchase Approval Summary on Adobe Forms, creating purchase orders via purchase requests based on user input.
- Created and designed the IDoc-to-file scenario in SAP XI using Integration Repository (IR), Integration Directory (ID), and IDoc sender adapter configuration.
- Developed reports for payment verification against purchase orders, material status across storage locations, and annual employee tax deductions.
- Developed BDC programmes to upload materials, change material descriptions via MM02, upload time data via PA61, and upload email addresses via PA30.

SAP HR-ABAP Lead | *Karachi Electric Company, Karachi, Pakistan*

Duration: 22 Months (Mar-2007 – Jan-2009) **|** **Industry:** Utility **|** **Project:** SAP HCM Implementation

- Developed cost-centre-wise payroll summary reports using info types P0000 and P0001.
- Actively participated in all project phases: analysis, design, construction, testing, production, and post-production support.
- Modified multiple programmes to correctly process new employee sub-groups.
- Contributed to legacy data filtering strategies and migration planning for the ABAP development team.
- Developed data uploads using batch input recordings, created and executed BDC programmes via SHDB and SM35.
- Customised recorded programmes to map and convert client-specific fields into SAP fields.
- Transported Executable Programmes, Includes, Function Modules, Domains, Structures, and Tables from Development to QA using SE10 and STMS.
- Designed and created basic and drill-down reports in standard and ALV formats.
- Developed editable and non-editable ALV grids for data entry and reporting using classes and methods.

SAP ABAP Consultant | *Karachi Electric Company, Karachi, Pakistan*

Duration: 26 Months (Jan-2005 – Feb-2007) **|** **Industry:** Utility **|** **Project:** SAP ERP Implementation

- Deployed an ABAP Web Dynpro application on SAP Enterprise Portal through iViews, gaining experience in Portal Eventing.
- Implemented a BAdI on PO save to send email notifications to users immediately upon PO creation.
- Developed HR-OM uploads for creating vacant positions, account assignments, and employee group/sub-group assignments using transaction PP02.
- Developed detailed payroll reports showing the last 12 months of salary per employee, with month-on-month comparison for monitoring payroll changes.
- Developed a date-wise stock position report in MM using tables MARD, MARDH, and MSEG.
- Developed an SAP ABAP application providing new electricity connections within 72 hours of consumer application, integrating with third-party billing software via SAP .NET Connector wrapped in reusable ASP.NET web services.
- Used dialog programming to develop application screens with email notifications via class CL_BCS to the back-office manager.
- Configured Smart Forms/SAP Scripts for output types and message processing routines (Output Determination); managed printer settings using SPAD.

- Implemented MM enhancements M06B0005, MEREQ001, and MM06E005 for additional checks during Purchase Requisition/PO creation.
- Programmed user exits on MIGO saving for transfer postings and goods returns.
- Developed the ALE model including partner profiles, ports, and message type configuration for master data migration using ALE/IDocs.

EDUCATION (ALMA MATER)

Institution	Qualification	Year
Mohammad Ali Jinnah University, Karachi	MS in Computer Science — Specialisation in Software Engineering	2008 (3.0 GPA)
Gomal University, Dera Ismail Khan	Master's in computer science — Software Engineering	2003 (1st Division)
Gomal University, Dera Ismail Khan	Bachelor's in science — Mathematics & Statistics	1999 (1st Division)
Board of Technical Education, Peshawar	One Year Diploma in Computer Science — Software Engineering	1999 (1st Division)
Board of Technical Education, Peshawar	Three Year Diploma of Associate Engineering — Civil Engineering	1997 (1st Division)
Saint Helen's High School, Dera Ismail Khan	SSC — Board of Intermediate & Secondary Education, Bannu (Science)	1992

TRAINING & CERTIFICATION

- Successfully passed three SAP Certifications for ABAP, Fiori, and SAP Cloud.
- Received a record of achievement for Introduction to Software Development on SAP HANA from the Open SAP platform.
- Successfully completed the four-week SAP ABAP Workbench training programme from Siemens Pakistan (SAP Education Partner) in February 2007.
- Successfully completed the Oracle 9i Database Administrator Track from Oracle University, Pakistan in May 2004.

ACHIEVEMENTS

- Held First Position in an SAP Adobe Interactive Forms competition.
- Certificate of Merit — in recognition of meritorious performance as a team member in the development and implementation of the Oracle-based billing system at K.E.S.C., awarded by the Managing Director, K.E.S.C.
- Certificate of Excellence — in recognition of excellent and committed performance as a team member in the IT Division during 2006, in the capacity of Senior Software Engineer, awarded by the Chief Information Officer, K.E.S.C.

PERSONAL INFORMATION

Date of Birth	22nd December 1976
Postal Address	Apt #1103, V3 Tower, Cluster V, Jumeirah Lake Towers (JLT), Dubai, UAE
Nationality	Pakistani
Resident	Dubai, UAE
Professional References	Available upon request
